

MedioCROSS®

Riboflavin Formulations for Ocular Pathology

Avedro's **scientifically developed** MedioCROSS formulations ensure **rapid diffusion** and **individual, sterile** applications for corneal cross-linking procedures.

Formulations for Ocular Pathology: Keratoconus and Corneal Ectasia

MedioCROSS TE

For trans-epithelial treatment (epi-on)

Formulation: 0.25% Riboflavin, 1.2% HPMC, 0.01% Benzalkonium Chloride

Volume: 2.0 ml

MedioCROSS M

For epithelial-off treatment

Formulation: 0.1% Riboflavin, 1.1% HPMC

Volume: 3.0 ml

MedioCROSS D

For epithelial-off treatment

Formulation: 0.01% Riboflavin, 20% Dextran

Volume: 3.0 ml

MedioCROSS H

For epithelial-off treatment

Formulation: 0.01% Riboflavin, Hypotonic

Volume: 1.5 ml

A Tradition of Science & Innovation

Thomas Steffens, founder of Medio-Haus, has set the standard for the production of high-quality riboflavin formulations since the introduction of corneal cross-linking. Its CE Marked riboflavin formulations have been used since 2001 for hundreds of thousands of corneal cross-linking procedures worldwide.

MedioCROSS riboflavin is:

- Manufactured in a world-class German facility
- Sterilized using validated processes
- Produced by an ISO 13485 Certified manufacturer

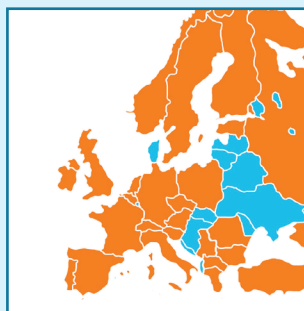

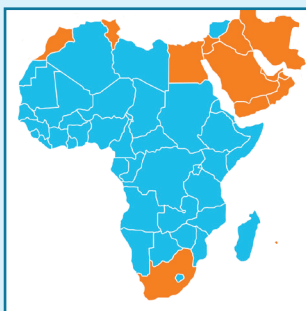

Medio-Haus also produces Avedro's proprietary VibeX riboflavin products and now provides all of its MedioCROSS riboflavin products exclusively through Avedro.

Avedro's team of scientists continue to be at the forefront of riboflavin formulation development to improve cross-linking procedures. With the addition of MedioCROSS to Avedro's family of riboflavin formulations, comes the opportunity to deliver the highest quality ophthalmic products possible to physicians and their patients.

Avedro is a privately held medical device and pharmaceutical company advancing the science and technology of corneal cross-linking.
